▶ Link any alarm to camera view

▶ Video verification of alarms

▶ Manage inputs and outputs of the cameras using the Unison client

▶ Supports a range of DVR and NVR systems to allow video playback of recorded video

PACOM Unison is designed to provide easy management for video surveillance to all kinds of businesses. This makes PACOM Unison a suitable solution for organizations and customers with high demands on flexibility and ease. PACOM Unison cleverly acts as a 'bridge' between video and other sub-systems. An alarm can be easily verified by automatically streaming a video from a camera located at the alarm point. This allows the operator to take immediate action and to focus on relevant surveillance images.

The user friendly functions of the system, efficient bulk programming and the powerful graphic overviews make administration easy and saves time. The graphical user interface, including dynamic display of alarms and camera status, considerably simplifies management. By taking advantage of the intelligent linking function in PACOM Unison, users can easily link an object in the system with a point on the map.

PACOM Unison is a market leading platform with the ability to link various video surveillance systems in an efficient way. PACOM Unison uses the latest technology and offers a powerful and easy to use solution that suits all types of businesses and organizations.
